Technical Skills

- HTML5 | CSS | Bootstrap
- Python
- Git | GitHub
- Flutter

Skills

- Time Management
- Creativity
- Active Listening
- Decision-Making

Education

Bachelor of Engineering   Stella Mary's College of Engineering   *Kanyakumari,*INDIA   *2021 - 2025*

- Pursuing 4th year in Computer Science and Engineering (CGPA:7.50)

Projects

- **HAVO :Your Hassle-Free Bus Ticket Booking Solution APP** : The users to select bus routes and receive secure digital boarding passes. I also provided bus operators with schedules, online tickets, and sales updates.
- **SMCE Bus pass Application**: The project includes functionalities for issuing new bus passes, deleting existing ones, and viewing bus passes. This project streamlines the bus pass management process, making it more efficient and eco-friendly.
- **SMCE Transport Application:** SMCE-Transport is a designed for college students and staff to conveniently manage and view their bus passes for college transportation. With SMCE-Transport, users can quickly access their bus pass details. This app aims to enhance the overall transportation experience for the college community

Achievements

- **Kumari Hackathon:** We have selected to Finale with 47 teams over 300+ teams. **(05/2023)**
