Career Objective

Seeking for a challenging role to help my prospective employer by contributing to impactful applications while honing my skills and abilities dedicated to continuous learning and improvement.

Technical Skills

- **Frontend:** HTML5 | CSS | Bootstrap | JS | Flutter
- **Backend Frameworks:** Django | Firebase
- **Programming Languages:** Python | Dart
- **Database:** MySQL

Education

Degree/Department	Batch	College	CGPA
B.E. /CSE	2021-2025	Stella Mary's College of Engineering	7.55

Area of Interest

- **Web Development**
- **Mobile App Development**

Projects

- **Car Rental Application (Django)(2024):** Create a Car Rental App with Django by setting up models for users, cars, and rentals. Allow users to log in, browse available cars, and book rentals. Include dashboards for users to view their bookings and for admins to manage car listings
- **Shopkart–E-commerce Website(Django)(2025):**Developed a fully functional e-commerce web application using Django framework. The platform allows users to browse products by category, add items to a shopping cart, manage favorites, perform user authentication, and place orders. Integrated dynamic product pages, search functionality, and admin panel for product management.
- **Image Dashboard(Django)(2025):**Developed a responsive web-based image uploader using Django. The application allows authenticated users to upload, preview, edit, and delete images through an intuitive dashboard interface. Implemented user login/logout, real-time image display, and timestamp-based tracking
- **BMI Calculator Application(Flutter)(2025):** Created a Simple Calculator App Using Flutter that performs the logic of BMI formula and give the Body Mass Index. Designed a clean and user-friendly interface with responsive layout for different screen sizes.
- **Quiz Application(Flutter)(2025):** Created a Simple Quiz App Using Flutter that performs the if else logic and give the results. Designed a clean and user-friendly interface with responsive layout for different screen sizes.
